

SELF-SERVICE BOXES

with an intelligent system
which can replace
the receptionist

Better service for your guests, lower costs for you

The self-service box takes care of handing over the room keys or cards to your guests. **24/7 service. Contactless. No staff present.**

We have developed a solution that adapts to your hotel, guest-house or apartment house. Hand over the room keys contactlessly or get a fully self-service reception desk.

This will offer your guests better services while simultaneously reducing your labour costs.

Keyguru boxes and their various uses

**NIGHT RECEPTION DESK
SUBSTITUTION**

FULLY SELF-SERVICE

**HIGH-TECH ALTERNATIVE
FOR MODERN TRAVELERS**

Solution for uncertain times

- Contactless handing over of room cards or keys, not only during the COVID pandemic
- Minimization of reception desk operation costs
- Comfort and time flexibility for your guests
- No fixed-term contract - only one month's notice period
- You do not pay for the box when hotels are ordered to close

Box	Number of compartments	Rental price per month (without VAT)
Mini box	5	53 EUR 26,5 EUR
Middle box	9	83 EUR 41,5 EUR
Standard box	14	113 EUR 56,5 EUR

One-time licence fee: **265 EUR***

Installation by our technician: **150 EUR***

+ travel expenses according to individual agreement

Self-installation according to the manual: **58 EUR***

* Prices are without VAT

WE ARE WITH YOU!

**All our tariffs at
50% discount***

* We want to support hotels during the coronavirus crisis. That is why we currently offer a 50% discount on all tariffs till June 2021. If you have to close a hotel due to state regulations, you pay no fees (for the period of closure). If you have very low occupancy, we can negotiate a price for individual handovers. If you have very low occupancy, we can negotiate a price for individual handovers.

Take advantage of the possibility of **integrating Keyguru into your PMS or connecting it to the check-in application.** You will have a completely unattended reception desk.

The Keyguru box will take care of **handing the keys or cards over to your guests 24/7 without the need for the presence of a receptionist.** Thanks to the connection to the check-in application, guests fill in the necessary documents conveniently on-line before arriving at the hotel.

Guests will automatically receive an e-mail/SMS with a code for the box, from which they will collect their keys upon arrival. **Contactless. Stand-alone. Safe.**

- Integration into your PMS or stand-alone box operation;
- Connection to check-in applications: Alfred, MyStay;
- Connection with reservation systems: Previo, HotelTime*, Agnis*, Better Hotel*.

We provide boxes with metal compartments, it is possible to supply the box with white compartments made of durable plastic (on request). We are happy to add a sticker with your logo or make it in your company colors.

Technical specification and installation

- Internal compartment size 6 × 8.5 × 8 cm (W × H × D)
- Touchscreen display
- Dedicated GSM module with Internet connectivity
- The box is powered by electricity (230 V)
- The backup power supply will cover power failure for 10 hours
- The box is designed for indoor use

Easy installation, even easier to use

Box installation is very easy. We will provide it completely or you can do it yourself according to the manual.

Fasten to the wall, plug in, turn the key and that's it. The box is ready to use in a few minutes.

The touch screen with large characters guarantees easy operation. Guests choose their language.

How does the Keyguru box work in practice?

You integrate the Keyguru box with MyStay or Previo/Alfred

You have another PMS or you only use the Keyguru box

1

At the end of business hours, you will set up the key handover **in your PMS or check-in application** via the Keyguru box for guests who have not yet arrived.

At the end of business hours, you enter guests who have not yet arrived in the Keyguru system. The following information is required:

- Guest identification (for your orientation),
- Guest's e-mail/phone No. for sending the box access code,
- Date FROM when TO when the code should be valid (the box should be accessible).

2

Place the room keys or cards in the Keyguru box.

3

From **your PMS or check-in application**, guests will receive an e-mail/SMS with a code to pick up their keys or cards from the box.

From the **Keyguru system**, guests will automatically receive an e-mail/SMS with a code to pick up their keys or cards from the box.

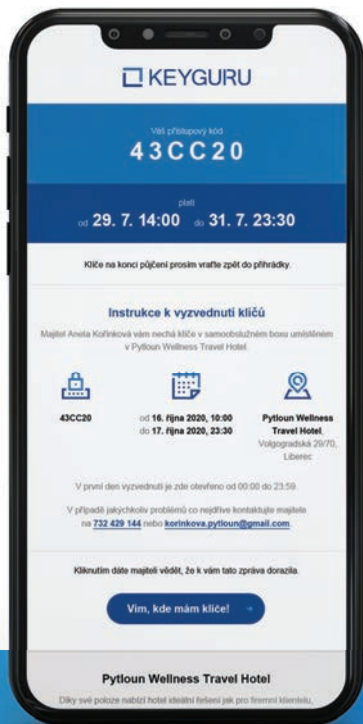

4

Upon arrival at the hotel, guests will pick up their keys or card from the box. And they can then immediately go to their rooms.

!

The Keyguru box does not provide check-in for guests or payment options for their stay. For that you have to use booking systems like Booking.com, applications for checking-in like Alfred or Mystay, or your hotel system – e.g. Previo, Opera, Better Hotel, Trevlix, etc. We can provide integration for a number of these systems and we will be happy to present you with an offer for a completely self-service reception.*

**Under preparation*

Safety comes first

- Each guest has a unique code
- Each code is time-limited
- Reset the code remotely
- Sensors warn of tampering
- Automatically generated emails and SMS with code for each guest

Keyguru boxes are suitable for your front desk as well

We are very particular about high quality services and personal contact with guests, yet for us the box means a great aid. We try to keep up with the times - some guests prefer modern technology. That's why we bought the box while maintaining the operation of the reception desk. Our receptionists have at least time for more important things than handing keys over.

We want to provide our guests with maximum comfort but having a 24/7 reception just for a few late check-ins is unnecessarily expensive. Keyguru box can replace a night receptionist at a minimum of costs, we are saving hundreds euros a month in salaries.

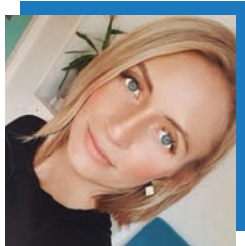

Due to low occupancy it is not worth having a front desk and closing the hotel was a real threat to us. Guests can check-in alone and the cost of the reception is minimal with Keyguru box. Thanks to this we manage to operate the hotel open at this difficult time.

We want to provide guests with contactless check-in, so they do not have to worry about Covid-19. Thanks to online check-in, guests do not have to spend their time at the reception and be in the queue with others. They just pick their keys up and go straight to their room.

I run a small guesthouse on my own and cannot afford to sit there all day. Thanks to Keyguru box I do not have to be around all day or plan my day according to guests' arrival. I work more effectively now and on top of that guests are more satisfied because they can check-in flexibly.
